## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6 and 14-15, drawn to compounds of claimed general formula I and a diagnostic system for detecting aminopeptidase A comprising compounds of general formula I, classified in class 514, subclass 7.
  - II. Claims 7-9 and 11, drawn to a process of preparing the compounds of claimed general formula I with intermediate compounds of formulas II-IV, classified in class 514, subclass 7.
  - III. Claim 10, drawn to method of making the compounds of claimed general formula I with intermediate compounds of formulas II, III and VI-VII, classified in class 514, subclass 7.
  - IV. Claims 12-13, drawn to method of using compounds of general formula I for preparation of medicaments, classified in class 514, subclass 7.
  - V. Claim 16, drawn to methods of treatment using the compounds of general formula I, classified in class 514, subclass 7.
  - VI. Claim 17, drawn to method of diagnosis using compounds of general formula I, classified in class 514, subclass 7.

2. The inventions are distinct or independent, each from the other because:

The product of Group I is related to the methods of Groups II and III as a product and processes of making the product. The inventions are distinct if either or both of the following

can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed may be post-translational modifications or made by chemical peptide synthesis.

The product of Group I and the methods of Groups IV-VI are distinct inventions as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be use in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the proteins of Group I can be used for each of the different method Groups (IV-VI) as claimed, thus, demonstrating three distinct methods of using the product of Group I.

The methods of Groups II-VI are distinct wherein each method group has different steps and require different components and have different end results and/or effects.

3. Upon election of any of groups I-VI, the Applicants are required to elect one species for searching purposes.
4. Because these inventions are distinct for the reasons given above and the search required for one group is not required for any other group, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Dell Chism whose telephone number is 703-306-5815. The examiner can normally be reached on 7:30 AM - 4:30 PM, Monday through Friday.
